MT Brentry project sign-up page

MT Brentry common project tools

All members of the MT Brentry project utilise the defined digital tools for information exchange and communication. By registering your contact information in this Project sign-up, you will receive invitations to the Project website, the communication platform - Jira, and the common data environment platform - Dalux, as well as to the training sessions required before using these tools.

Project website

Here you will find project information, a contact list, applicable information requirements, and defined guidelines. You can also access the project platforms and associated manuals.

Communication platform - Jira

Project communication, meetings, and issue management are performed through Atlassian - Jira. Here you will find communication between project members, meeting protocols, and project decisions. It is through Jira you raise your questions, provide your answers, host your meetings, and manage your project issues.

Common Data Environment platform - Dalux

All project documents, drawings, and 3D models are stored and shared in Dalux. Here is where you will find all shared design information and also where you provide your input for design coordination, as well as deliverables for review sessions and final publication. Dalux also provides means for model and drawing review, design issue and review comment coordination, and digital production issue management.

Please click + to the right and read this text about contact information mangement, before registering your participation in the project.

Since you want to participate in the MT Goole project, we need to collect and process your contact information such as name, email address, and telephone number. We primarily need this to be able to provide access to the digital tools the project uses for communication and digital information management.

Your contact information will be reported in a general contact list on the project's website so that other participants can reach you. Your information will also be in the systems you log in to; where other participants will be able to see your name, email address, and in some cases telephone number. To some extent, the providers of these systems will also be able to see your information. None of the suppliers have the right to disseminate your information without our approval.

We have received your information from you directly or via your contract manager/employer. We apply current privacy legislation at all times in all processing of personal data. The legal basis for processing your personal data is "public interest".

The project will never communicate your data to any external party with the aim that they will be used in other ways than that the project can be run according to our jointly established working methods.

Your data will be saved [as long as you are a member of the project and/or as long as your data is required to ensure

a sufficient history and traceability of the information containers produced.].

The personal data we process about you is shared with [other project participants and stakeholders]. We may also share your personal information with a third party, provided that we are required to do so by law

In connection with us collecting your information, we want you to be aware of how to proceed if for any reason you do not want us to use your information or want us to delete information you have already provided to us. In these cases, please contact Plan B for a request.
